1. Claim 1 line 3 "brushless" is spelled incorrectly.
2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over 2001-303436 as cited by applicant in view of Nagashima et al.
4. 2001-303436 discloses motor drive where motor acts as a drive source; motor drive unit for switching drive voltage which is applied to stator coils on basis of a rotational position of a rotor detected by a magnetic sensor for detecting pole position of magnet; , see abstract . 2001-303436 lacks disclosing sunroof device, and push pull mechanism and pushing and pulling a push pull means which is linked with motor by speed reduction unit. Nagashima et al disclose push pull mechanism pushing and pulling a push pull means, which is linked with motor by speed reduction unit, and discloses sunroof and control unit, see paragraph 25-26 and 22. It would have been obvious to one of ordinary skill in the art to combine the motor drive of 2001-303436 with sunroof control of Nagashima et al for improved control.
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sorimachi et al, Imaizumi et al disclose sunroof control.
